## **1. Introduction**

**You do the printing, we do the forming.**

Hyform emblems are created using sophisticated nameplate technology. These versatile 3-D products can:

- Have metallic and non-metallic finishes
- Incorporate full-color graphics
- Make complex shapes and individual letters
- Are durable enough for exterior applications

Hyforms are useful in branding a wide variety of products such as automotive, electronics, appliances, and industrial machinery.

## **2. About Forming**

Using heat and pressure, a beautiful emblem is formed.

Materials are available for 5 to 7 year exterior grade durability.

Thickness can range from .040" to .25" with the typical product at .080".

A large variety of materials and finishes are available including metallics, woodgrains, carbon fibre, solid colors, leather, etc...

A full range of graphics can be incorporated into the product including four color process.

## **3. Pricing**

Call us for pricing or use our website's "Get A Quote Now!" form.

## **4. Contact Us**

Based in Windsor, California, HyDome is a provider of doming services and a manufacturer of custom formed nameplates. Founded in 1997 by owner Jack Hyde, we are now one of North America's largest domers.

Our dedicated staff and fast deliveries mean that HyDome is there when you need us the most.
